

DIGITAL LITERACY

Om Chaudhari

Introduction

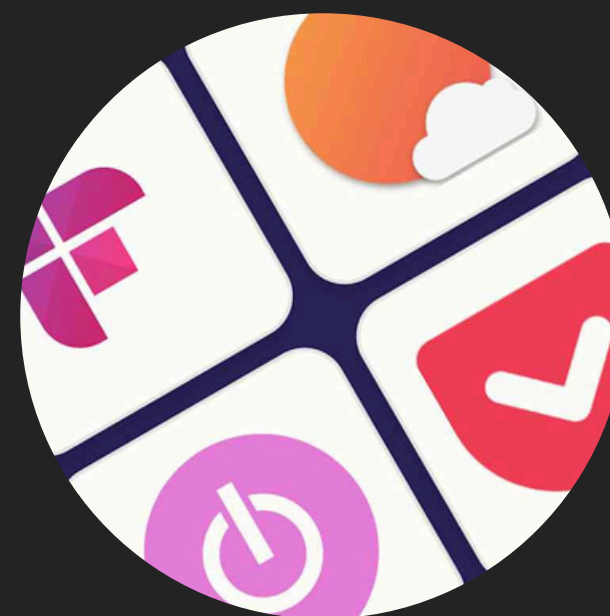

Digital literacy is the ability to confidently, safely, and critically use technology—such as computers, smartphones, and the internet—to find, evaluate, create, and communicate information. It combines technical skills with cognitive abilities to navigate digital environments, ensuring responsible online behavior and effective, ethical use of digital tools for work, education, and daily life

useful digital tools for student

AI-powered assistants

An AI-powered assistant is a software application utilizing AI, machine learning, and natural language processing (NLP) to understand queries, automate tasks, and manage workflows

Productivity apps

With AI-driven tools like [Reclaim](#) and [Motion](#) gaining popularity for automating workflows. Other top choices include [TickTick](#) (tasks/timers), [Obsidian](#) (notes), and [Slack](#) (communication).

Specialized learning apps

Specialized learning apps provide tailored educational support for special needs, autism, dyslexia, and speech challenges. Top apps include Proloquo2Go for communication, Otsimo for special education and speech, [ChoiceWorks](#) for routines, and [Clicker Docs](#) for writing. These tools improve skills through customizable, interactive, and engaging interfaces, helping learners build confidence and cognitive abilities

Safe internet practices

Safe internet use requires strong, unique passwords for every account, enabling multi-factor authentication (MFA), and keeping software updated. Protect personal data by using secure, private connections, avoiding suspicious links, and exercising caution on public Wi-Fi. Regularly back up data and verify website security using HTTPS

PASSWORD SECURITY

Use complex, unique passwords for different services and change them regularly. Never share passwords.

IDENTIFY SCAMS

Be cautious of suspicious links, attachments, and unsolicited emails/messages, which can be attempts to steal data.

SECURE BROWSING

Look for the padlock symbol in the browser address bar, indicating a secure connection (HTTPS).

DATA PRIVACY

Limit the personal information shared on social media, such as home addresses or phone numbers.
